## Certifying Authority

1. Click the [Open](#) button to choose a suitable file type (PDF/Image) from the drop down at the bottom and then select the document you want to sign. The selected document will be loaded on the pdf viewer. You can scroll to the page where you want to place your signature.
2. Use the [Select Image](#) button to select an image file which will be used to represent your signature graphically. This image can be your actual signature image or your organization logo.
3. Use the [Sign](#) button and select a suitable digital certificate to apply digital signature on the document you have selected previously. Click the [OK](#) button and type a suitable reason for the signature when prompted.
4. Finally, save your signed document using the [Save](#) button. You will be prompted where you want to save the signed document in your computer. Provide a suitable name to the signed file.
